Summary

Dedicated Associate Software Engineer with hands-on experience in full-stack development, mobile apps, and machine learning. Skilled in MERN/MEAN Stack, .NET, Flutter, and RESTful APIs. Proficient in React, Angular, Node.js, ASP.NET, and Firebase. Strong grasp of Agile, SDLC, OOP, and CI/CD. Proven ability to deliver scalable, user-focused solutions in academic and industry settings.

Education Qualifications

BSc(Hons) Software Engineering (Second Class Honours, Upper Division) (2021-2024)

- University of Plymouth (NSBM Green University)

Diploma in Information Technology (2019-2020)

- ESOFT Metro Campus (DiTEC)

Advanced Level (Biology) (2020)

- Kegalu Vidyalaya

Work Experience

Demonstrator (Nov 2024 – Present)

Gampaha Wickramarachchi University of Indigenous Medicine, Faculty of Indigenous Health Sciences and Technology, Department of Technology

- Conducting lectures and practical sessions on Artificial Inteliegence, Data Structures & Algorithms, Object-Oriented Programming (Java), .NET Technologies, and Web Development.
- Designed and led technical workshops for undergraduate students on topics such as Information Technology, GitHub and Programming .
- Mentored students in academic projects and coding best practices.
- Provided academic support and guidance in lab based environments.

Software Engineer Intern, Dayaratne Holdings (Pvt) Ltd (Sep 2024 – Nov 2024)

Development

- Contributed to ERP system development using Angular for frontend and .NET for backend services.
- Implemented key modules and integrated them with MySQL database.
- Used GitHub for version control and team collaboration

.UI/UX Design

- Designed application interfaces and screens using Figma based on stakeholder feedback.
- Delivered wireframes and high-fidelity prototypes aligned with user needs.
- Data Collection & CleaningCollected raw data formatted it for system compatibility.Cleansed and validated datasets before loading them into ERP modules.

Quality Assurance (QA)

- Performed test runs to verify key functionalities across user workflows

Technical Skills

- **Languages**: C#, Java, JavaScript, TypeScript, Dart.
- **Web**: HTML, CSS, Bootstrap, React.js, Angular, ASP.NET, Node.js, Express.js, MVC.
- **Mobile**: Flutter, Kotlin.
- **Database**: MongoDB, MySQL, Firebase, SQL Server (relational and non relational databases.)
- **ML/AI**: TensorFlow, Keras, FastAPI, Flask, Deep Learning, Neural Networks, data structures, algorithms
- **CI/CD Pipelines**: GitHub Actions
- **Tools**: Git, GitHub, Visual Studio, Figma, Photoshop
- **Methodologies & Practices**: REST API, Agile (Scrum), SDLC, MVC Architecture, Responsive UI Design, OOP Principles

Projects

Children's Skin Diseases Detection.

Technologies: Python, Flutter, FastAPI, TensorFlow, Keras, Pandas, Node.js, MongoDB

- Developed a mobile app to help parents detect children's skin diseases early using AI.
- Overcame challenges in dataset preparation by collecting images and creating a new high-quality dataset for CNN model training.
- Integrated the trained model with the app, ensuring accurate predictions.
- **Outcome**: Achieved over 85% prediction accuracy during testing, providing an accessible early detection tool
- Git Hub : https://github.com/darshanaweerasooriya/ChildCare.git

Gamified Social Media Platform for Students

Technologies: React.js, Node.js/Express.js, MongoDB, Figma

- Developed a full-stack MERN web application to address students' unproductive use of social media, enabling academic content sharing while allowing teachers to monitor engagement.
- Overcame challenges in implementing gamification and managing user permissions by designing a custom marking and reward system and implementing a role-based model for students, teachers, and admins.
- **Outcome**: Increased academic collaboration and engagement through gamification features.
- GitHub : https://github.com/darshanaweerasooriya/Hero-dev-.git

Stationery Shop POS System

C#, SQL Server, Windows Forms, .NET

- Developed a desktop-based Point of Sale system to streamline stationery shop operations, including inventory management, billing, and analytics.
- Overcame challenges in designing a relational database to handle many-to-many relationships between items and sales, and implemented efficient CRUD operations for products and categories.
- Built features including secure login, role-based user management, item and category management, billing, and sales analytics.
- **Outcome:** Improved store operations efficiency with instant communication and centralized management.
- Git Hub : https://github.com/darshanaweerasooriya/StationeryPOS.git

Fitness & Diet Tracking Mobile Application

Flutter, Node.js/Express.js, MongoDB

- Developed a personalized fitness app that generates custom diet and workout plans based on user profiles and goals.
- Overcame challenges in implementing real-time chat using WebSocket for live communication and calculating users' daily calorie and nutrient intake using equations in the backend.
- Added features for goal setting, progress tracking, and chat-based coaching support.
- Outcome: Improved user motivation and engagement through interactive tracking and real time support.
- Git Hub : https://github.com/darshanaweerasooriya/DIetPlan_MobileApp.git

Phoenix Furniture Management Application (Group Project)

Java Swing, OpenGL, Java 3D, Figma

- Desktop-based system allowing customers to design furniture in 2D and 3D before purchase, with features for product customization, order placement, and order tracking.
- Overcame challenges in implementing Java 2D and 3D visualizations, coordinating team work, and integrating OpenGL and Java 3D for interactive design previews. Used GitHub to track progress and manage contributions.
- Outcome:Helped customers make better purchasing decisions by providing interactive 2D and 3D previews, which reduced post-purchase dissatisfaction.
- Git Hub : https://github.com/Plymouth-University/main-assessment-group-20.git

Achievements & Certificates

- Certificate in Introduction to Artificial Intelligence – SLIIT University (Gained foundational knowledge in AI, Machine Learning, and practical experience with Python, TensorFlow, and scikit-learn.)
- Batch Representative - Software Engineering, Plymouth Batch 10 (NSBM)
- Mentor - Esthetique 21 Hackathon
- Participant - Hack to Night 2022 (Team Falcon)
- Merit Awards - International English Competitions
- Rugby Player - Kegalu Vidyalaya

Leadership & Activities

- **Conducted Workshop on Information Technology fundamentals (GitHub, LinkedIn, industry overview)**
  Gampaha Wickramarachchi University of Indigenous Medicine
- **Mentored Workshop on Mobile Application Development**
  Gampaha Wickramarachchi University of Indigenous Medicine
- **Mentored GitHub Hands-On Workshop**
  Gampaha Wickramarachchi University of Indigenous Medicine
- **Mentored Career Planning Workshop for undergraduates**
  Gampaha Wickramarachchi University of Indigenous Medicine

Soft Skills & Interest

- Communication
- Teaching, Leadership
- Team-oriented with a collaborative mindset
- Time Management
- Strong analytical and problem-solving abilities
- Presentation and Public Speaking
- Good written and verbal communication skills
- Artificial Intelligence, NLP
- Social Work.
- Data Structure and Algorithms.
- Writing, Reading, Carom , Chess.
